

## **High-Powered Rocketry at Tennessee Tech**

### Students for the Exploration and Development of Space

The Students for the Exploration and Development of Space (SEDS) at Tennessee Tech have been exploring the world of high power rocketry for three years. The SEDS team will give a brief history of their rocketry program which includes a two-stage rocket and a roll control rocket. With two club rockets under their belt, the SEDS team is currently working on their third, a 12-foot rocket that will carry a nine-pound payload to 10,000 ft.
