

**Mode of transportation--form in
which the material is moved**

A. As particles (velocity important):

(1). Suspension

**Velocity of transporting
media**

vs.

**Terminal velocity of
particle**

- 1. size**
- 2. shape**
- 3. specific gravity**

(2). Bed load

Saltation

Rolling

Sliding

B. In solution (solubility important)

Terms:

Load

Particulate load

Dissolved load

Capacity

Competence
