

## COMMON ROCK-FORMING MINERALS

Igneous Rocks	Sedimentary Rocks	Metamorphic Rocks
Plagioclase Feldspar Anorthite    Ca-Rich Bytownite Labradorite Andesine Oligoclase Albite        Na-Rich	Calcite  Dolomite  Gypsum  Halite  Clay Minerals Kaolinite Montmorillonite  Iron Oxides Hematite Limonite  Quartz Opal Chert Chalcedony  Orthoclase  Also many of the igneous rock-forming minerals occur in this group, as detrital minerals.	Garnet  Staurolite  Kyanite  Calcite  Micas  Talc  Chlorite  Serpentine  Graphite  Quartz  Also many of the igneous and sedimentary rock-forming minerals may be formed by metamorphic processes.
